

PEST LINK

COMPLETE PEST SOLUTIONS

FLEA TREATMENT PREP SHEET

Preparations Prior To Treatment:

Clearing Spaces:

- Remove all objects from under beds and small items from floors to allow access for thorough treatment.
- Clear all carpeted floors, including closets, of boxes, clothing, and any items that may obstruct treatment.

Pet Bedding:

- Wash pet bedding in hot water or dispose of it if washing is not possible. Seal it in a plastic bag and discard it in an exterior trash bag.

Vacuuming:

- Vacuum all carpeting and rugs meticulously, paying attention to corners, edges, and areas where pets spend time.
- Carefully vacuum pet sleeping and resting areas, including under furniture, cracks in floors, and draperies.
- Vacuum furniture thoroughly, especially between and under cushions.
- Vacuum wood, tile, and vinyl floors. Vacuuming is preferred over mopping as it effectively removes fleas.

Disposal:

- Empty the contents of the vacuum cleaner into a plastic bag and dispose of it immediately in an outside container.

Pet and Food Preparation:

- Remove pets from the home before treatment. Store or cover all food, including pet food, and remove the litter box.

Aquariums:

- Cover aquariums and turn off pumps. If you have saltwater fish, inquire about specific instructions for their care during treatment.

Pet Treatment:

- Arrange for flea-infested pets to be treated simultaneously with the home.

At Time of Treatment:

HVAC Units:

- Turn off HVAC units to prevent the dispersal of treatment materials.

Vacation of Premises:

- Vacate the house for at least 4 hours to allow treated floors to dry thoroughly.

After Our Treatment:

Ventilation:

- Air out the house by opening doors and running the HVAC system for 5 minutes.

Resumption of Normal Activities:

- Resume normal use of the house and floors.

Carpet Shampooing:

- Avoid shampooing carpets for at least two weeks to ensure the treatment remains effective.

Continued Vacuuming:

- Continue daily vacuuming for a week. Dispose of vacuum bags in sealable plastic bags after each use.

Garment Laundering:

- Launder and dry garments on a hot cycle to eliminate any fleas or eggs that may be present.

Follow-Up Visit Preparation:

- Repeat all preparations on the day before the follow-up visit scheduled 14-21 days after the initial application.

Note: Your cooperation in completing these preparations is crucial for the effectiveness of the treatment. Following these steps diligently will maximize the success of flea eradication in your home.

Thank you for your cooperation, Should you have any questions or concerns, please feel free to contact us.

Best regards,
Pestlink.
